

ON SITE INSPECTION SERVICE - SINGLE OR MULTI SITE

On Demand Service – when the equipment to be inspected cannot be removed from site, is permanently installed, is in constant use or the volume of items is not economical to transport.

Overview

This efficient, Pay as You Go (PAYG) Inspection Service is designed for businesses and individuals needing key items of equipment independently inspected, tested, compliant and back available to use on site as quickly as possible. Ideal when it is more convenient for our Inspection Team to travel to your site whilst fulfilling all inspection and record keeping requirements.

Why use SpanSet's On Demand Inspection Service?

#TrustThe Experts

SpanSet are safety equipment specialists!

We design, manufacture, supply and install a wide range of height safety and lifting products. We have a **depth of knowledge** in equipment and hold a wide range of spares for ease of replacement and repair.

SpanSet Team

Our **highly trained inspectors** have extensive industry experience offering a consistently high standard of inspection.

IDXpert Asset Management

SpanSet use **IDXpert Management**. All items we inspect are RFID tagged to digitally trace the exact time, inspector, location and duration of inspection for full accountability with records maintained for future reference.

Reporting

All inspected equipment is returned with a condition report and certificate for items that pass. Digital or hard copy - duplicates available

Q What is the On Site Inspection Service?

Site Inspections
 Site inspection of installed systems, assets located at a single or multi sites, that possibly cant be moved due to frequency of use, size and weight, or site restrictions. Our experienced service team will visit your site to inspect your equipment and providing everthing passes, your equipment will be ready to use with a new thorough examination certificate. You may wish to collate mobile equipment at a single site. Please contact us for further information.

Q How does it work?

<p>Get in touch</p>	<p>Get a quote</p>	<p>Book Site Visit</p>	<p>Inspection Process</p>	<p>Full Certification</p>
<p>Make an enquiry through our website, over the phone or via email. Our easy to complete web form helps streamline the quoting process for you.</p>	<p>We provide a quote based on a brief description of items, requirements and whether you need a priority service.</p>	<p>A date and time for the inspection will be agreed. If powered access equipment is to be hired this will often be delivered the day before and collected the day after the inspection.</p>	<p>Inspection is carried out by the SpanSet Team and logged on our asset management system, which immediately sends a summary of the inspection results via email. For systems any remedial works will be quored immediately.</p>	<p>As soon as the site inspection has been completed your items that have passed are ready for use. Digital copies of the thorough examination certificate are then sent to you.</p>

Q What items do SpanSet inspect?

<p>Personal Fall Protection Equipment</p>	<p>Engineered Fall Protection Equipment</p>	<p>Lifting Equipment Accessories</p>	<p>Lifting Equipment Machines</p>	<p>Installed and Engineered Fall Protection Equipment</p>

Single Site Inspections

Q

How much does it cost?

Please contact our Inspection team for a quote: inspections@spanset.co.uk tel: 01606 737494.

Q

How long does inspection take and how long before my inspected items can be used?

The site visit for your inspections will be scheduled for single or multiple days depending on the number and type of assets, their geographical location and any access restrictions. Our working hours are between 8:30am and 4:30pm however, we may not be on site for the full duration of this as travel time is also factored in.

Your inspected assets will be fully certified and ready for use immediately after the inspection has been carried out.

Q

What happens if the equipment fails the inspection?

Consumable items (e.g. harness or lanyard)

As it is not economically viable to repair consumable items, following a failed inspection or once beyond the manufacturer's specified product lifespan, we shall quote for supply of a replacement.

Serviceable items (e.g. rescue kit or fall arrest block)

Due to the capital cost of these items, it is more economical to service and repair within limits of the manufacturer's guidance and product lifespan. Beyond the product lifespan we'll quote for replacement.

Q

Future inspections - do you send out automatic reminders when they are due?

Yes. 1 month prior to your thorough examination certificate lapsing an email reminder and quotation for an inspection/service will be sent.

Q

I currently use the PAYG service, could I upgrade to a contract in the future?

Yes, of course. Records of any items previously inspected by SpanSet remain in our asset management system. Please contact us for details on discounts available for upgrading to a managed contract.
