# WEBRAIL PLUS

## Vehicle Deck Fall Prevention

WebRail Plus by SpanSet is an effective fall prevention solution for use with commercial vehicle load decks and trailers. Featuring our patented Tension Force Indicator this simple to use system gives significant improvements to current work practices during the loading and unloading of flatbed vehicles and trailers.

The polyester webbing and high visibility indicators provide an effective fall hazard warning at the edge of the deck. The Tension Force Indicator gives a known and measurable force on the upright posts or bodywork structure. The whole system can be removed in minutes to facilitate crane and fork access, or can be left in situ if preferred.

The kit comes with 3 pairs of high visibility straps to fit 3 sides of the deck complete with snap hooks and tensioning device. Spare parts and replacement straps are readily available. Posts are not included with the kits, however engineering specifications are available by contacting SpanSet.

### Order Codes

WEBRP-06	Set of 6 WebRailPlus assemblies for 6.0m deck
WEBRP-08	Set of 6 WebRailPlus assemblies for 8.0m deck
WEBRP-10	Set of 6 WebRailPlus assemblies for 10.0m deck
WEBRP-12	Set of 6 WebRailPlus assemblies for 12.0m deck
WEBRP-13	Set of 6 WebRailPlus assemblies for 13.6m deck

### Tension Force Indicator (TFI)

The TFI is fitted as standard on the system as added security against unintentional over-tensioning and providing optimal tension for effective fall prevention.
