

HLTAID009 Provide cardiopulmonary resuscitation

RTO ID: 46524

Course Outcomes

SpanSet Australia's *HLTAID0009 Provide cardiopulmonary resuscitation* course provides the skills and knowledge required to perform cardiopulmonary resuscitation (CPR) in line with the Australian Resuscitation Council (ARC) guidelines.

This unit applies to all persons who may be required to provide CPR (or refresh their existing CPR accreditation), in a range of situations, including community and workplace settings.

Duration

½ Day – plus pre-reading

Entry Requirements

Students should have a good level of the English language to be able to appropriately communicate and numeracy skills in relation to telling time and counting. A preliminary assessment for these entry requirements is necessary.

It is important to note that the HLTAID competency standards require a level of physical ability to meet the evidence requirements for assessment. These standards relate to the level of performance required to provide resuscitation and respond to an emergency situation where there may be risk to life.

Training

- Fully customised learning materials.
- Experienced and professional trainers.
- Effective transfer of learning.
- Students are given comprehensive feedback throughout their course.
- Focused on industry-specific and Australian Resuscitation Council (ARC) requirements.
- Creating a seamless team-effort approach in enabling successful course completion.

Assessment

Students will need to demonstrate they have the necessary skills to respond to an emergency situation, perform CPR procedures, communicate details of an incident and review an incident. They will learn how to manage, in line with the ARC guidelines, unconscious casualties, both breathing and non-breathing, as well as how to hand over to emergency services.

Training Outcome

All successful students will receive a Statement of Attainment for *HLTAID009 Provide cardiopulmonary resuscitation*.

Where a student does not have the ability to perform resuscitation and/or first aid to the performance standard (due to lack of physical ability) - a Certificate of Participation will be issued instead.

Supporting our Students' Needs

SpanSet Australia will determine the support needs of students and provide access to educational and support services as necessary, so that students have every opportunity to achieve a successful outcome.

Please contact us if you have any queries or concerns relating to language, literacy, numeracy, disability or welfare needs you may have.

Location

Courses are delivered at our purpose built training facility in Sydney (Emu Plains), via our network of trainers across Australia or within your own workplace (in consultation with your Training Manager).

What do you need to bring?

We will supply all the appropriate equipment and PPE to undertake the training and assessment activities for this course.

Remember!
This CPR course must be refreshed every 12 months.
