GUARDIAN

LOAD RESTRAINT SYSTEM

Load restraint is a necessity within the transport industry and helps to protect the cargo and prevent accidents.

It doesn't need to be time consuming or risk the driver's safety.

Guardian Load Restraint has been designed to reduce the amount of time it takes to secure your load. The straps are suspended within the roof space of the

vehicle, making them quick and easy for the driver to access and use. You can save 30 minutes a day on a standard trailer.

The system can be used to secure any load from ground level, so the driver doesn't need to climb on the vehicle and risk a fall from height.

Fact Sheet

**Guardian saves up to
30 minutes per day per vehicle**

Approximately equivalent of £1560 saving per year per vehicle

This allows you to make more deliveries with the same resource

Guardian Load Restraint is manufactured to the highest levels of quality and safety

Tested up to 25,000 uses

Manufactured to EN:12195 AS/NZS:4380

Guardian is permanently attached to the vehicle and reduces strap loss

Protects straps from damage and being stolen. They will last longer and are always available.
