Wood Pole Anchor Strap

Product Code

2003177

What is it?

Quick release anchor sling designed for anchorage to wooden utility poles.

What can it be used for?

The Wooden Pole Anchor Strap has been designed and tested to create an anchor point on wooden poles capable of withstanding a shock loading; this means that it is intended to be used as part of a Fall Arrest System.

Who can use it?

A competent trained individual.

How long will it last?

The Wood Pole Anchor Strap has a maximum recommended lifespan of 10 years from the date of manufacture. The lifespan may also be reduced by the effects of use, damage or wear and tear. The lifespan will cease at the point when either one of these conditions is met. The condition of the product must be controlled in accordance with BS8437:2005 (or local regulations), this requires regular inspections to be carried out by a competent person. The competent person is responsible for determining the

point at which the product must be withdrawn from service.

How has it been tested?

The Wood Pole Anchor Strap has been EU Type Tested to EN795:2012 Type B Device.

What is it made from and why?

Polyester Webbing
Aluminium Buckle
Stainless Steel Attachment

Additional SpanSet Features

Individual Serial Numbering – All SpanSet height safety products are individually serial numbered for traceability.

What paperwork is supplied?

(Product Records and Information)
Instructions with pictorial guide.

Wood Pole Anchor Strap

Individual Product History Card – This record card contains all the documentation required to maintain the product. The front forms the European Declaration of Conformity and the table on the reverse can be completed too for the inspection record.

What training is required?

Although in itself this is a simple item to use, there are several stages that should be considered as part of the process as a whole. Training is available for all the stages outlined at the SpanSet training school in Middlewich or subject to suitability on a site of your choice.
