

1-X Scaffold Harness

Height Safety
Lifting
Load Control
Safety Management

Product Name:
1-X Scaffold Harness

Order Code:
1-X-Scaff

What is it?
(Product Description):

Full Body Harness with a single rear attachment point and reinforced shoulder straps to prevent wear while carrying equipment.

A Full Body harness is your link to the rest of your safety system. It must fit you correctly to do its job properly.

For extra protection and wear prevention a leather pad is sewn on each shoulder web making this harness perfect for carrying scaffold tubes.

What can it be used for?

(Intended Function):

This harness has been designed and tested to be part of a Fall Arrest System; this means that the harness can

be used to catch you in the event of a fall.

However it can also be used for as part of a Work Restraint System; this means that it can be used to limit your freedom of movement to prevent you falling.

What can I use with it? (Compatibility):

This type of harness is ideal for use with:

- Fall arrest lanyards, such as the T-Pak Elastic Lanyard for applications like scaffolding
- Overhead Fall Arrest Systems for unloading vehicles, such as the SpanSet "Capcha System"
- Adjustable Restraint Lanyards as part of your Work Restraint System in Powered Access Platforms

Who can use it?

(Competence, Size and Adjustment):

There is no weight limitation on this harness, however it will only work effectively if it has been fitted correctly.

Therefore it is essential that you ensure your harness fit you correctly.

If you are not sure how fit your harness you should contact SpanSet Training Department for advice.

How long will it last?

(Maintenance, Inspection and Lifespan):

The lifespan of the 1-X Scaffold harness is limited by the following:

The product has a maximum shelf-life of 10 years from the date of manufacture.

The product has a maximum service-life of 5 years from the date of first use.

The lifespan may also be reduced by the effects of damage or wear and tear.

The lifespan will cease at the point when any one of these conditions is met.

The condition of the product must be controlled in accordance with BS8437:2005, this requires regular inspections to be carried out by a competent person.

1-X Scaffold Harness

How has it been tested?

(Relevant Standard and Quality Assurance):

The 1-X Scaffolder harness is CE marked under the Personal Protective Equipment Directive. The CE marking process includes independent testing to EN361:2002 – Personal protective equipment against falls from height – full body harnesses. The SpanSet manufacturing process is quality controlled and audited by the British Standards Institute to the international standard for quality management ISO9001:2008.

What is it made from and why?

(Specification and Materials):

- 45mm Polyester Harness Webbing
- Wide and supple providing increased comfort for the wearer
- Leather Shoulder pads for extra wear protection
- Highly Chemical and UV resistant providing increased lifespan
- Steel Buckles and Attachment Point
- High strength and corrosion resistant
- Polished for durability and ease of use

Additional SpanSet Features:

Individual Serial Numbering – All SpanSet Height safety products are individually serial numbered for traceability.

Pictorial Fitting Instructions – The 1-X Scaffold harness label incorporates a pictorial fitting guide.

Personal ID Marking – The 1-X Scaffold harness label incorporates an area for users to add their own personal identification markings.

What paperwork is supplied?

(Product Records and Information):

Multilingual Instructions with pictorial fitting guide
Individual Product History Card – This record card contains all the documentation required to maintain the product. The front forms the European Declaration of Conformity and the table on the reverse can be completed to form the inspection record.
Pocket Inspection Guide – This simple to follow pocket card identifies the key areas requiring inspection.

What training is required?

(Competency):

Although in itself this is a simple item to use, there are three stages that should be considered as part of the process as a whole. Training is available for all the stages outlined at the SpanSet training school in Middlewich or subject to suitability on a site of your choice:

Assessment and planning – Training Module 9 Management of Work At Height

Use – Training Module 1 Height Safety Equipment Appreciation and Inspection followed by an appropriate practical module.

Inspection and Maintenance – Training Module 1 and Module 7 Competent Person Practical Inspection & Record Keeping.

All training for work at height is conducted in accordance with BS8454:2006 and is audited as part of our ISO9001:2008 quality management system.
