

Attachment Sling

Height Safety
Lifting
Load Control
Safety Management

PRODUCT NAME

Attachment Sling

ORDER CODE:

ATSL

WHAT IS IT?

(Product Description):

The Attachment Sling is an endless anchor sling CE Marked to EN795. It is constructed like a roundsling in a continuous loop with all the load bearing fibre protected inside a sleeving.

WHAT CAN IT BE USED FOR?

(Intended Function):

The Attachment Sling has been designed and tested to create an anchor point on a section of structure capable of withstanding a shock loading; this means that it is intended to be used as part of a Fall Arrest System. The Attachment Sling can be configured in a number of ways to allow attachment to different shapes of structure.

WHAT CAN I USE WITH IT?

(Compatibility):

The Attachment Sling is compatible with the following equipment and their associated systems;

- The T-Pak Lanyard range
- The ATLAS lanyard range
- CLIMA work position lines
- CLIMA vertical lines
- Horizontal safety lines
- Fall Arrest Blocks

If you are unsure of any equipment and its compatibility with the Attachment Sling please contact SpanSet Ltd.

WHO CAN USE IT?

(Competence, Size and Adjustment):

Work at height can be a high risk activity. It is therefore essential that all users are competent in the pre use inspection, installation and use of this item.

The Attachment Sling has a fixed length, but can be configured in different ways to fit around various sizes of structure. The Attachment Sling is also available in a range of sizes from 1m to 8m effective working lengths (2m to 16m circular length).

The Attachment Sling can be used by any size or weight of worker.

HEIGHT SAFETY

Attachment Sling

HOW LONG WILL IT LAST?

(Maintenance, Inspection and Lifespan):

The lifespan of the Attachment Sling is limited by the following:

- The product has a maximum shelf-life of 10 years from the date of manufacture.
- The product has a maximum service-life of 5 years from the date of first use.
- The lifespan may also be reduced by the effects of damage or wear and tear.

The lifespan will cease at the point when any one of these conditions is met.

The condition of the product must be controlled in accordance with BS8437:2005, this requires regular inspections to be carried out by a competent person.

HOW HAS IT BEEN TESTED?

(Relevant Standard And Quality Assurance)

The Attachment Sling is CE marked under the Personal Protective Equipment Directive.

The CE marking process includes independent testing to EN795:1996 – Personal protective equipment against falls from a height – Anchor Devices.

The SpanSet manufacturing process is quality controlled and audited by the British Standards Institute to the international standard for quality management ISO9001:2008.

WHAT IS IT MADE FROM AND WHY?

(Specification and Materials):

Polyester Yarn

- Lightweight
- High strength
- 70kN Minimum Breaking Strength (7 ton)

Polyester Sleeve

- Black to differentiate them from lifting slings
- 100% coverage of load bearing fibres
- UV and abrasion protection for load bearing fibres

Additional SpanSet Features:

Individual Serial Numbering – All SpanSet Height safety products are individually serial numbered for traceability.

WHAT PAPERWORK IS SUPPLIED?

(Product Records and Information)

Multilingual Instructions

Individual Product History Card – This record card contains all the documentation required to maintain the product. The front forms the European Declaration of Conformity and the table on the reverse can be completed to form the inspection record.

Pocket Inspection Guide – This simple to follow pocket card identifies the key areas requiring inspection.

WHAT TRAINING IS REQUIRED?

(Competency):

Although in itself this is a simple item to use, there are three stages that should be considered as part of the process as a whole. Training is available for all the stages outlined at the SpanSet training school in Middlewich or subject to suitability on a site of your choice:

Assessment and planning - Training Module 9 Management of Work At Height

Use - Training Module 1 Height Safety Equipment Appreciation and Inspection followed by an appropriate practical module.

Inspection and Maintenance - Training Module 1 and Module 7 Competent Person Practical Inspection & Record Keeping.

All training for work at height is conducted in accordance with BS8454:2006 and is audited as part of our ISO9001:2008 quality management system.

For additional information on training please go to www.spanset.co.uk or Email: training@spanset.co.uk
