Safe Lite Lifting Kit - SLLK Range

ORDER CODE	DESCRIPTION	SWL	Length Of Rope in Kit	Length Of Drop in a 2:1 config
5/3386	SLLK 150/12.5	150Kg	25m	12.5m
5/3387	SLLK 150/25	150Kg	50m	25m
5/3388	SLLK 150/50	150Kg	100m	50m
5/3389	SLLK 150/75	150Kg	150m	75m

What is it (Product Description):

The Safe Lite Lifting Kit is designed for safely lifting lite loads and incorporates an "auto drop-proof function" for total safety. It can be used indoors or outdoors and allows the user to lift lite loads in compliance with the lifting regulations, LOLER.

LOLER defines lifting equipment as "work equipment for lifting or lowering loads and includes its attachments used for anchoring, fixing or supporting it" and "a load" includes any materials that are lifted by the lifting equipment".

What can it be used for? (Intended Function):

The Safe Lite Lifting Kit is intended for use with lite loads up to 150Kg in a single lift. All manner of loads such as tools, equipment, scaffold components etc., can be lifted and lowered safely and with properly rated equipment.

The SLLK lifting kit is made up of individual components which are pinned together to form one kit with one serial number, therefore saving time on logging kit inspections.

The SLLK can be operated with the locking pulley situated at the top or the bottom of the lift, this makes the kit very versatile giving the user different options for a safe lift.

Positioning the locking pulley at the top gives the lift a 2:1 mechanical advantage, halving the weight of the load.

With the locking pulley at the bottom, enables the user to perform a higher lift. This is achieved by detaching the swivel karabiner from the base of the locking pulley and connecting direct to the load, which in allows the user to utilise a Pilot Line system. Part Number E1000/01.

What can I use with it? (Compatibility):

The SLLK can be utilised to lift any load up to 150Kg, the kit comes supplied with a 1m -1T—Roundsling.

The Safe Lifting Kit is ideal for use in conjunction with the Grabba Safe lifting bags as well as SpanSet lifting slings, Joker hooks and shackles

The kit is compatible with all lifting equipment but if you are unsure of any equipment and its compatibility please contact SpanSet Ltd.

Who can use it? (Competence, Size and Adjustment):

Persons involved in lifting operations should have an appropriate level of training such as the SpanSet Safe Lifting and Slings modules.

Lifting Equipment can be a high risk activity. It is therefore essential that all users are competent in the pre use inspection and use of the Safe Lifting Kit. In accordance with Lifting Equipment Lifting Operations Regulations 1998 (LOLER) —States that a user is required to be competent in the use of lifting equipment therefore SpanSet offer a range of lifting courses to cover this.

Safe Lite Lifting Kit - SLLK

How long will it last?

(Maintenance, Inspection and Lifespan):

The Safe Lifting Kit, in line with lifting equipment generally, has no fixed shelf life but its continued use is subject to a satisfactory inspection at regular intervals by a competent person.

How has it been tested?

(Relevant Standard And Quality Assurance)

The SLLK has been vigorously tested and rated with a WLL.

The Safe Lifting Kit should undergo a thorough examination at a minimum period of every six months in line with LOLER, subject to usage and conditions of use. Also all lifting equipment should be inspected by the user prior to use and before returning to storage.

The SpanSet manufacturing process is quality controlled and audited by the British Standards Institute to the international standard for quality management ISO9001:2008.

What is it made from and why?

(Specification and Materials):

- Rated to 150Kg SWL
- Comes in a variety of lengths.
- Each Safe Lifting Kit comes packed complete in its own weatherproof roll-top rucksack style bag.
- The kit contains durable 11mm semi-static kernmantle rope terminated with a rated sewn eye that is easy to inspect and guaranteed for strength.
- Soft Polyester Roundsling conforms EN1492-2
- Fully Pinned System with one serial number.
- Lite Aluminium Components
- Strong Water Proof Roll Top Bag
- Comes in a Variety of Lengths

Additional SpanSet Features:

Individual Serial Numbering – All SpanSet Height safety products are individually serial numbered for traceability.

What paperwork is supplied?

(Product Records and Information):

Individual Product History Card – This record card contains all the documentation required to maintain the product. The front forms the European Declaration of Conformity and the table on the reverse can be completed to form the inspection record.

The kit conforms to the requirements of the Machinery Directive 2006/42/EC and is supplied with a European Declaration of Conformity that states its Safe Working Load and rope length. Each kit is identified with a unique serial number which enables traceability of the kit and its components.

What training is required?

(Competency):

Although in itself this is a simple item to use, there it is recommended that training is undertaken. Training is available at the SpanSet training school in Middlewich or subject to suitability on a site of your choice:

Persons involved in lifting operations should have an appropriate level of training such as the SpanSet Safe Lifting and Slings modules.

SL1-Safe Slings and Lifting Appreciation
SL2-Practical Lifting and Slings Beneath the Hook
SL3- Rigging and Lifting Lite Loads at Height
SL4-Lifting Equipment Inspection and Record Keeping.

For additional information on training please go to www.spanset.co.uk or Email: training@spanset.co.uk
